# Pet Lodge SMALL ANIMAL AND RABBIT HOME

### FOR RABBITS, GUINEA PIGS, CHINCHILLAS & FERRETS

Instruction Sheet for item #'s: 150903, 150910, 150927

Set-up Guide

Thank you for purchasing the Pet Lodge™ Rabbit Home. You will soon discover how quickly and easy it is to set-up the suitcase style home! NOTE: To take down the wire home, simply reverse the set-up instructions. The wire home folds down to a compact size for easy storage and travel. For safety reasons, we suggest removing your pet's collar and I.D. tags each time before it enters the home.
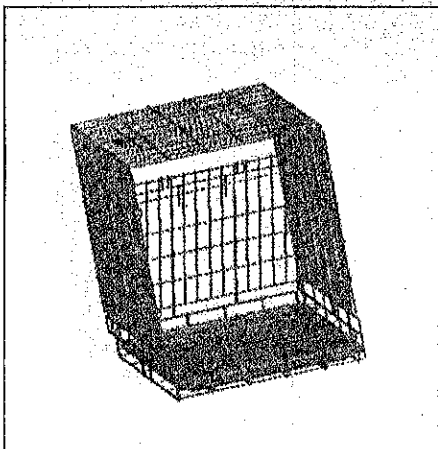

**Step 1** Set cage on the ground with pan on bottom. Unhook latch from side of cage.

Step 2 Unfold the front of the cage completely and set it on the ground. If you do not completely unfold the first panel, the second panel will not unfold easily.
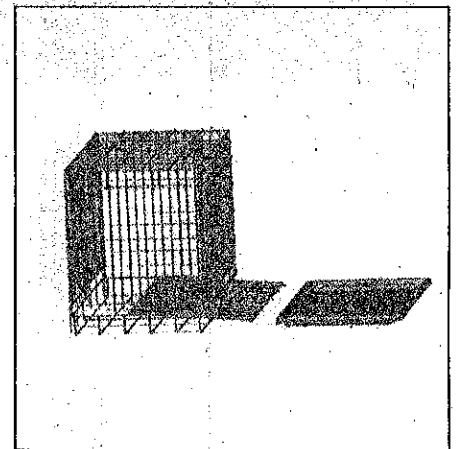

Step 3 Pull up the back side of cage so that the front and back are parallel to each other.

Step 4 Reach into the cage and pull side up and out. When panel is almost upright, pull up on the top panel to allow side panel to fit through. Pull panel outside of cage so that the two top hooks are on the outside of the top panel. Repeat for other side.

Tray can easily be slid out the front of the cage for cleaning. Unlatch front hook and pull out tray.

For dwarf rabbits, chinchillas, guinea pigs, and hamsters, REMOVE FLOOR GRID. Remove tray and unhook grid from cage. Slide grid out same opening as tray. Replace tray.
